---

Yes, Madelyn has been in touch with the GAU.

My intent has been to have Madelyn and DanO coordinate with Gene to ensure that we have accurate well construction records in our file, and to ensure that we know how water wells are constructed, e.g., to what depth, cement/grout interval, etc., and where they are located.

At some point in time, we likely will benefit from a conference call to discuss where we are and where we are going.

I think that after Madelyn visits with GAU again would be a good time..... soon.

Peter have you showed those water well records to our GAU? All of the wells on the Singleton and Singleton B leases had a GAU protection depth of 350'.

No, but I am assuming that he may be referring to the Singleton 1H lease no. 274030 since the operator did not provide a copy of the well log for this well but did provide one for the Singleton 2H lease no. 274031.

Gene, are you aware of a Murray No. 1 well in the area?

Madelyn gave me copies of water well records that show water wells as deep as 540 feet.  
Madelyn, please visit with me Tuesday to discuss. Thanks,
