Tom, I hope you are doing well this fine Friday.

Paul and Cummiskey ask us to see if we could help get this bill through House Ways & Means. My team has been helping with some of the local delegation members, but I had a couple of questions to better understand your intent.

I have read the current version of the legislation. I understand the change to include transmission projects eligible to be paid for by municipal revenue bonds. The part that I believe is causing question is allowing General Assembly the ability to exempt the requirement for local referendum/election to approve. Can you share with me the intent of this section and why it is needed. This will help me craft comments to try and sway folks to get on board.

Thanks Tom and feel free to give me a call if you would like to discuss further.
