**Attachments:** Formaldehyde - No link to Leukemia.docx

Mr. Jackson,

The attached document provides citations and summaries of 19 published and peer reviewed studies that prove that inhaled formaldehyde does not cause leukemia in humans.

We have previously provide this data to the EPA staff conducting the formaldehyde IRIS assessment, but we do not believe they have properly integrated this new science into their analysis.

I encourage you to have the NCEA staff explain to you why they continue to ignore this very compelling science.

Regards,

David
